

How much PiktoTape™ will I need?

Use this chart as a guide to determine the amount of tape you'll need for each workshop you're planning. Tape quantities are calculated by the number of students drawing and the time they have to draw. PiktoTape™ kits contain individual rolls of tape as opposed to the total amount of tape you need to complete a project.

For example: A Draw Kit contains 30 rolls of PiktoTape™. This is enough tape for 25 students to draw for 2 hours. This time could be a single 2-hour class with 25 students or two 1-hour classes with 25 students.

Note: Because each student needs access to a roll of tape when drawing, and Draw Kit has 30 rolls of tape, 1 Draw Kit would not be enough for 50 students to draw for one hour.

OF DRAW KITS NEEDED

Sculpt Kits include 12 rolls of 2" wide tape. This size is great for adding 3D textures and filling large spaces. For the best experience, we suggest adding 1 Sculpt Kit for every 2 Draw Kits you order. Order yours at DavisArt.com/PiktoTape.
